Backend engineer (3+ yrs) building TypeScript/NestJS APIs at 40K RPS, Kafka pipelines over 350M records, and AWS/EKS infra. Background in LLVM compiler tooling (Rolls-Royce) and C++ distributed systems (UCLA).

Work Experience

Backend Engineer II Nov 2023 – Aug 2026
Veteran Benefits Guide *Las Vegas, NV*

- Led a Kafka-based ETL platform to migrate 350M+ lead records from SugarCRM to Salesforce, using dual writes and automated validation for a two-week phased cutover with zero downtime.
- Built the TypeScript and NestJS backend for a disability-claims platform, including military-ID authentication, serving 100K+ active users and handling peak production API traffic of 40K requests/second.
- Automated end-to-end intake, including DocuSign signature collection and document verification, reducing turnaround from 3 days to 10 minutes.
- Cut CI/CD pipeline time from 30 to 5 minutes via Docker Buildx caching and an AWS App Runner → Amazon EKS migration, with all infrastructure defined in Terraform.
- Rolled out LaunchDarkly flags across 4 services, decoupling deploys from releases and enabling staged beta rollouts without redeploys.

Software Analyst Sep 2022 – May 2023
Rolls-Royce *Lafayette, IN*

- Extended LLVM passes for Checked C static analysis of aircraft engine control software, reducing falsely flagged control-flow paths by 70%.
- Built a CLI to port FreeRTOS and zlib components to Checked C, reducing migration time from 3 hours to 10 minutes for 25+ engineers.

Research Intern May 2020 – Aug 2020
UCLA *Los Angeles, CA*

- Implemented DLedger, a distributed ledger, primarily in C++ for Named Data Networking, reducing average per-node storage overhead by 30% during normal operation.

Skills

Languages: TypeScript, Python, Go, C++, C, Java
Backend & Data: Node.js, NestJS, REST APIs, PostgreSQL, Apache Kafka
Cloud & DevOps: AWS (EKS, Lambda), Kubernetes, Docker, Terraform, GitHub Actions, Jenkins

Projects

Zen Browser — Contributor Contributions

- Merged 2 PRs into Zen Browser (50K users) for workspace-scoped tab switching and extension settings on empty tabs.

clai — Creator GitHub

- Local-first terminal UI that translates natural-language requests into editable shell commands;

Education

Purdue University May 2023
Master of Science, Computer Science
